

Screen Protection Film

Privacy Film

No one wants private information exposed. Whether it's line phone or Smartphone, zCover Privacy Film protects on-screen information so your communications stay confidential, even in the most public places. zCover Privacy Film makes screens look black from the side, preventing others from viewing your screen information and preventing the invasion of your personal space.

- Helps protect confidential communications
- Darkness device screen when viewed from the side.
- Allows the user to see clearly while others see a dark screen.
- Easy to attach; leaving no residue when removed.
- Helps protect fragile LCD screens.
- Ideal for users conducting business on the go.

Protection Film

A new facet in screen protection is now available to help give LCD screens a new, longer life. With a gloss finish, Protection Film features optically clear film with an easy-to-clean coating and a more durable hard coat designed to make LCD looks like new longer.

- Durable hard coat – helps protect LCD screens and helps screens endure the rigors of daily use.
- Glossy surface – maintain the finish of a glossy display or instantly upgrade a matte display to high-gloss.
- High-tech adhesive – helps minimize minor scratches and scuffs.
- Optically clear, ultra-thin film offers greater than 93% transmission, keeping display bright with no color distortions.
- Anti-static – helps prevent the attraction of dust and lint during film application.
- Easy-to-clean surface – even markers and ink pens wipe right off.
- Easy on, easy off – easy to apply! Removes easily, leaving no residue.
