FOR IMMEDIATE RELEASE
Richmond BC, Canada June 24, 2010

zCover gloveOne Silicone Protection Case
for Apple iPhone 4

zCover, the innovative accessory maker, today announced that its versatile, resilient and user friendly gloveOne cases for Apple's iPhone 4 are tested and start shipping today.

zCover's gloveOne design is focuses on intuitive usability while offering protection in its fullest form. The gloveOne APIPD first release has nine colors black, blue, green, grey, ice clear, pink, purple red & yellow, each one designed to work seamlessly with iPhone 4's new sensors, flashlight, front and back cameras.

The gloveOne design is a perfect fit for every feature of the iPhone 4 "As we anticipated, the iPhone 4's sophisticated and slim compact design required precise molding and tooling to create the ideal contoured case for iPhone 4." said Sean Sa, vice president of zCover Inc. "zCover finalized our tooling until we got a real active Apple iPhone 4."

As good as MacWorld Awards 2008 Best iPhone Accessory winner zCover's gloveOne design focuses on intuitive usability while offering protection in its fullest form. zCover has always focused on the merging of function and style, but this time the gloveOne not only provides full access to all of the iPhone's functions, but also has a few enhanced functions of its own.

What may very well become gloveOne signature style is the reinforced corners support a natural hand position when in horizontal mode and have a reinforced silicone layer that works as a "crash cushion" during drops and falls. The rugged side finger grooves provide a comfortable fit for any sized hand.

zCover's innovative port flip-cover has been applied to the iPhone perfectly, protecting the Apple dock port from sand, dust, dirt and liquids, while still allowing full accessibility for charging, or even docking, your iPhone while still in the gloveOne case.

Several button features have also been included.

The sleep/wake button has been enhanced so it is still protected but remains easy to press.
1. Pre-tooling new sensors and cameras in face of iPhone 4
2. Volume button protection prevents you from accidentally turning down your favorite song.

3. A die-cut for the ring/silent switch allows you to change modes without difficulty.

Compatible zCover accessories available for this new released iPhone 4 cases sold separately at zCover online store www.zcover.com
