FOR IMMEDIATE RELEASE

## **zCover announces the new iSA micro5G silicone cases for Apple's iPod nano 5<sup>th</sup> Generation**

RICHMOND, BC, CANADA – September 10, 2009

zCover announces the upcoming iSA micro5G protective silicone case for the iPod nano 5G, presented recently at Apple's "It's Only Rock and Roll" media event in San Francisco. The iSA micro5G silicone case will incorporate the functional, stylish design of the popular iSA micro3G and iSA micro4G cases and introduce smart enhancements for the nano 5G's new features, which include a video camera, an FM radio, a pedometer, microphone and speaker.

zCover's micro line of silicone cases are made with HealthCare grade silicone, a tear and puncture resistant material that is weather resistant and washable. zCover cases are proven to protect devices from dust, dirt and impact while keeping them free from germs and unwanted bacteria.

The 5th generation of iSA micro cases for Apple's iPod nano will have the same great features as previous versions, like side-grip-strips for better grip and an easy-to-access earphone port and key-lock switch. Plus, in addition to an opening for nano 5's video camera lens, the micro5G silicone case can be used with zCover's Universal Clip system, which allows the device in case to be attached to any of zCover's interchangeable accessories, including zCover's Armband, Windshield Clip, Shoulder Strap Clip, Sun Visor Clip and Shirt Clip.

The first available retail pack for selected stores is our well-known Armband pack, which includes zCover's Universal Armband, an adjustable, water resistant, band that attaches with double-secure Velcro straps, ideal for carrying the iPod nano. The Armband allows a wide perimeter range from 6" to 18' and fits wrist, arm, or leg. The double-secure Velcro straps attach on both ends of the band and hold the device securely in place. Attach the nano 5G in zCover's silicone, TPU or hard case to the Universal Armband using zCover's Universal Clip. The Universal Clip rotates 360 degrees, so the nano is easy to access and clicks into just about any position. The one-press-release button makes it quick to attach and remove the device from the Armband, convenient when shooting video. Headphones attach at the bottom of the case and stay untangled when rotated on the Armband.

The Armband Pack is shipped in an environmentally friendly, hard plastic box that compliments Apple's nano 5 packaging for an ideal gift combination.

All zCover products and packaging are made with recyclable materials to reduce paper usage and save trees. In addition, the plastic retail box is re-useable as a portable, accessories container.

The iSA micro5G Armband Pack is available for \$29.99 USD. Additional iSA micro5G cases, accessories and combinations are available online at [www.zcover.com](http://www.zcover.com).

###
