

zCover Press Release

FOR IMMEDIATE RELEASE

zCover announces the new iSA micro5G hard case for Apple's iPod nano 5th Generation

RICHMOND, BC, CANADA – September 10, 2009

zCover will be releasing the iSA micro5G line of protective hard cases for the new iPod nano 5G. The iSA micro5G will incorporate the functional, stylish design of earlier versions and introduce smart enhancements for the nano 5G's new features, which include a video camera, an FM radio, a pedometer, microphone and speaker.

zCover's micro line of hard cases are made from PC plastic, a clear, scratch resistant, hard plastic that is lightweight yet strong, and safe to wash. The case features a slide cover with integrated screen protection. The Open click wheel area is surrounded by a bevel-edged circle so it's comfortable and easy to use. The sleek, slim design shows the beauty of the iPod and keeps it clean, dust-free and looking brand new. The case provides easy access to all ports and controls and allows the iPod to be charged while it's still in the case. The iSA micro5G hard case is compatible with zCover's Universal Clip system, which is used to attach to zCover's interchangeable accessories, including the Universal Armband, Windshield Clip, Shoulder Strap Clip, Sun Visor Clip and Shirt Clip.

The first available retail pack for selected stores is our well-known Armband pack, which includes zCover's Universal Armband, an adjustable, water resistant, band that attaches with double-secure Velcro straps, ideal for carrying the iPod nano. The Armband allows a wide perimeter range from 6" to 18" and fits wrist, arm, or leg. The double-secure Velcro straps attach on both ends of the band and hold the device securely in place. Attach the nano 5G in zCover's silicone, TPU or hard case to the Universal Armband using zCover's Universal Clip. The Universal Clip rotates 360 degrees, so the nano is easy to access and clicks into just about any position. The one-press-release button makes it quick to attach and remove the device from the Armband, convenient when shooting video. Headphones attach at the bottom of the case and stay untangled when rotated on the Armband.

The Armband Pack is shipped in an environmentally friendly, hard plastic box that compliments Apple's nano 5 packaging for an ideal gift combination.

All zCover products and packaging are made with recyclable materials to reduce paper usage and save trees. In addition, the plastic retail box is re-useable as a portable, accessories container.

The iSA micro5G Armband Pack retails for \$29.99 USD. Additional iSA micro5G cases, accessories and combinations are available online at www.zcover.com.

###
