

zCover Press Release

FOR IMMEDIATE RELEASE

zCover develops new protective case made with TPU for Apple's iPod nano 5th Generation

RICHMOND, BC, CANADA – September 16, 2009

zCover has announced the development of a new series of protective cases made with TPU (Thermoplastic Polyurethane), an environmentally friendly material offering good clarity, increased hardness with similar properties as silicone.

The new series of TPU tube cases for the iPod nano5G will feature open top and bottom and incorporate smart enhancements for the nano 5's new features, which include a video camera, an FM radio, a pedometer, microphone and speaker.

Sean Sa, VP of Business Development at zCover says, "Silicone is soft, with 50 degree hardness, the iSA micro hard case for nano is a hard, plastic see-through style. The TPU case will be somewhere in between, with a medium hardness of 70 degrees".

TPU is washable and resists tears and punctures. zCover cases are proven to protect devices from being damaged by liquids, dust, dirt and impact while keeping them free from germs and unwanted bacteria.

The tube case for the nano 5G will have the same popular features as previous iSA micro 3G and micro 4G cases, like side-grip-strips for better grip and an easy-to-access earphone port and key-lock switch. Other features include full screen protection and a beveled opening for the click wheel.

The TPU series of silicone cases can be used with zCover's Universal Clip system, allowing the device in case to attach to any of zCover's interchangeable accessories, including zCover's Armband, Windshield Clip, Shoulder Strap Clip, Sun Visor Clip and Shirt Clip.

The tube 5G Armband retail package will be available at selected retail outlets. The pack includes the tube 5G case and zCover's Universal Armband, an adjustable, water resistant, band that attaches securely with double-secure Velcro straps, ideal for carrying the iPod nano. The Armband allows a wide perimeter range from 6" to 18" and fits wrist, arm, or leg. The double-secure Velcro straps attach on both ends of the band and hold device securely in place. Attach the nano 5G in zCover's silicone, TPU or hard case to the Universal Armband with zCover's Universal Clip. The Universal Clip rotates 360 degrees, so the nano is easy to access and clicks into just about any position. The one-press-release button makes it quick to attach and remove the device from the Armband, convenient when shooting video. Headphones attach at the bottom of the case and stay untangled when rotated on the Armband.

The Armband Pack will be shipped in an environmentally friendly, hard plastic box that compliments the nano 5G packaging for an ideal gift combination.

All zCover products and packaging are made with recyclable materials to reduce paper usage and save trees. In addition, the plastic retail box is re-useable as a portable, accessories container.

The tube 5G Armband Pack will sell for \$29.99 USD. Additional iSA micro 5G cases, accessories and combinations are available online at www.zcover.com.

###

zCover® is a leading protective cover and case solutions provider.
