INSTALLATION GUIDE

zSight® Tempered Glass Screen Protector for Cisco CTS-CTRL-DV10 Capacitive touch LCD 10.1" Controller

PID: CIT10FGC zSight Tempered Glass Screen Protector for Cisco CTS-CTRL-DV10 Capacitive touch LCD 10.1-inch Controller, Crystal Clear

Preparation

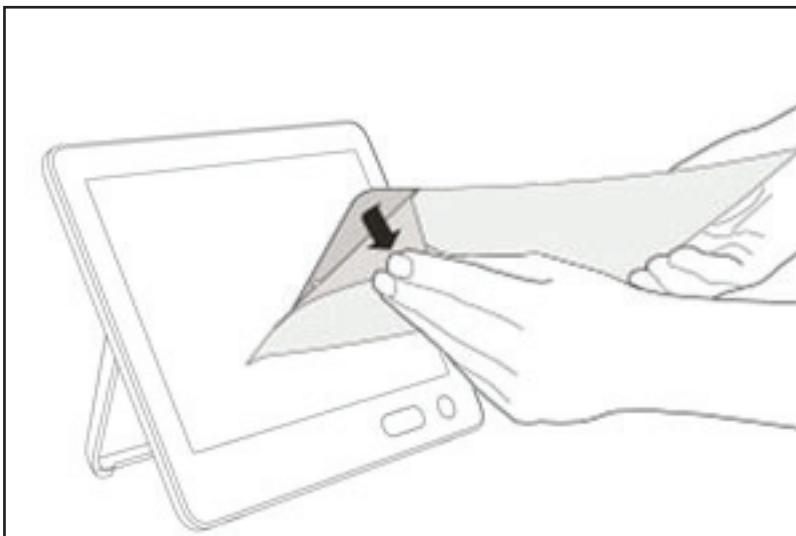

- Find a low or dust-free environment
- Ensure your hands are clean

Installation

Caution! Handle the glass carefully at all time

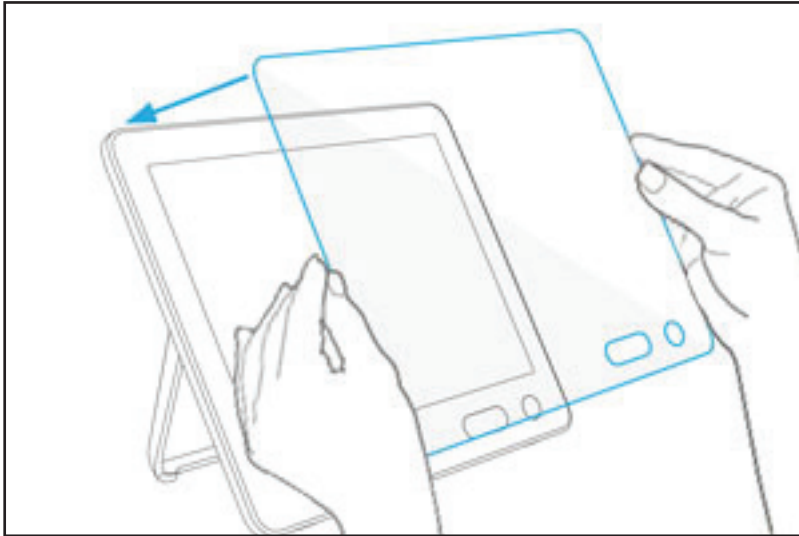

1. Inside the zSight Tempered Glass box includes an Alcohol Pad. Use this pad to clean your device screen. Make sure you clean it well and all the dusts have been removed. Then, wipe out the excess alcohol from your screen using the microfiber cloth – also included in the package. Make sure you leave it dry.

2. Peel the protective layer off.

Caution! Handle the glass carefully at all time

3. Then gently place over the adhesive side on top of your device's screen. Make sure you align the glass to your device's screen – you only have one shot you know. Watch out for the cut-outs, make sure they are aligned with your device's buttons.

4. Now that the glass is aligned, press gently on the middle part of the glass. Watch and wait for the adhesive part to spread across your screen. If you notice any bubbles under your tempered glass screen protector, use your microfiber cloth and wipe the glass starting off from the center.
